## OBJECTIVE

Recent Computer Science graduate with over five years of hands-on academic and personal experience in software development, eager to apply a strong foundation in programming, problem-solving, and system design to real-world challenges. Passionate about technology and committed to continuous learning, I am seeking a junior software developer role where I can contribute to innovative projects and grow within a dynamic development team.

---

## ACTIVITIES

I enjoy spending time outdoors with friends and family, I like going to the driving range, going to beaches, and walking national trust routes. At the same time, I do also enjoy spending lots of time Infront of screens, weather that is developing a new game, a new website, or watching the latest movie at the cinema.
